

SORGHUM SUNDANGRASS

“The best of both plants”

HIGHLIGHTS

- High biomass of forage sorghum combined with the high regrowth potential of sudangrass
- Grows best in the warm season (soil temps > 60 degrees), 3-4 cutting potential
- Available with or without the BMR trait (Brown Midrib) which increases digestibility for livestock
- Must be aware of both potential nitrate and prussic acid poisoning in livestock

Lifespan	Annual
Winter Hardy?	No
Root Structure	Fibrous
Use before	Soybeans
Average Seeds / Pound	~18,000
Seeding Rate (drill)	15-20 lbs/ ac
Seeding Rate (broadcast)	30 lbs / ace
Blended Seeding Rate	7-10 lbs/ ac
Blends well with:	Cowpeas
Forage Suitability	• Silage - Excellent • Hay - Excellent • Grazing - Excellent
